

The Staff has reviewed the transcript and record of the public hearing on the FY83 Construction Grants Priority System and List held on July 7, 1982.

Based on that review, the Staff is recommending the following:

1. Item 11 under the Administrative Control System be amended to read as follows:

Funds shall not be awarded for the construction or rehabilitation of lines (Categories IIIA, IIIB, IVB) in any project within a sewer entity in an amount which exceeds 25% of the Federal share of construction cost of the treatment facilities (Categories I, IIA, and IIB) approved within said with one exception. New interceptors necessary for the relocation of treatment facilities will not be subject to the 25% limitation. However, should a project within a sewer entity contain an interceptor necessary for treatment work relocation which exceeds 25% of the treatment work cost, no other linework categories of work (IIIA, IIIB, IVB) will be eligible for participation by the Construction Grants Program.

2. College Station S.I.D. No. 243 be added to the Priority Ranking System.
3. The Cities of Lead Hill and Diamond City be considered as a joint project in the Priority Ranking System.
4. Factor 6 (Special Priority) of the Large Community Ranking System be amended to read as follows:

Additional points are given to ensure that entities with special priority as set by the Commission on Pollution Control and Ecology are fundable. Only the Hot Springs Sewer Improvement Districts fall into this category for FY83. A re-evaluation of the special priority for the Hot Springs S.I.D.'s will be performed during FY83 to determine their status in the FY84 System and List.

5. The flow factor used in the Priority Ranking System for Helena be revised to 1.2.

By this Minute Order, the Commission on on Pollution Control and Ecology approves the FY83 Priority System and List as presented at the public hearing, but with the incorporation of the Staff recommendations made above.
