

The Commission has been advised that several bills addressing the issue of out-of-state solid waste have been introduced during the legislative session currently in progress. In order to preserve the resources of the Department and the regulated community, the Commission deems it proper to await legislative decisions on this issue.

To this end, the Commission hereby orders the Department to take no action for a period of ⁶⁰~~120~~ days upon any application by private persons, firms or corporations for a new or modified permit which will increase the influx of out-of-state solid waste into the state.
