Subject: Proposed Change In Regulations for the Buffalo National River Watershed..

Dear ADEQ:

I whole-heartedly support the proposed changes to regulations that would not allow any new CAFO's in the BNR watershed. I deeply regret that the current one was allowed.

We have a unique and extraordinary resource in the BNR. The tourist dollars that it brings into Arkansas are a boon for the small communities in the area. It will be unexcusable if an unusual rainfall event or human error causes us to degrade the natural resources in any part of the area even temporarily. I've read that meat companies are targeting Arkansas as an expansion area for CAFOs and weak environmental regulations is one of the reasons.

Please reverse course and do everything you can to protect this jewel! It would be a shame if a state government agency caused us to lose something so unique and precious.

Sincerely,

Don Dombek
