

The Buffalo River is natural,  
national treasure, and to  
destroy it would be a great  
error. To degrade or destroy  
for the profit of a few and  
to the detriment of many  
would be more than an  
error, it would be a sin.

Once gone, no amount of  
money could bring it back.

Please remember, that as  
Arkansas Pollution Control  
and ecology Commission, you  
are, or should be, on the  
side of the people of Arkansas,  
not private commercial  
ventures.
