Subject: Ban new CAFOs

June 30, 2014

To all of ADEQ:

The first sentence on your home web page says "ADEQ protects the air,water, and land from the threat of pollution"! Threat is the key word. It is your job to protect the Buffalo River Watershed from threat of pollution.

I strongly support the third-party ruling to ban med and large sized hog CAFOs in the Buffalo River Watershed.

The Buffalo National River is one of Arkansas's greatest tourism attractions! I make the 5 hour drive from south Arkansas several times a year just to enjoy the Buffalo River! On my last trip I experienced a horrific smell from a field that had recently been sprayed with hog waste. Wow! That will surely run off the tourists!

And, what about the e.coli threats?

The whole situation reeks of a big pile of hog poop!

I am terribly disappointed that ADEQ, Gov. Beebe and Cargill have allowed the C & H hog FACTORY to continue to ruin our BNR. Please do your job by eliminating these threats to the BR Watershed.
