Subject: Proposed Changes to Reg 5 & Reg 6

Dear Mr. Szenher,

I voiced my stand being in support of the proposed changes to Reg. 5 & Reg. 6 at the public meeting in Harrison AR on June 17th. This email is to confirm in writing my position.

I continue to be in favor of the proposed changes to Regulations 5 & 6. Due to the sensitive nature of the geology(primarily Karst) in the Buffalo National River watershed I believe it to be inadvisable to permit any additional medium to large CAFO's in this region.

Sincerely,
Laura Timby
