

Dear Mr. Szymer and The
A. D. F. Q.

Please, accept this letter as my statement that, "I do not support a complete moratorium on animal feeding operations in the Buffalo Field Watershed. As a farmer and rancher and "native Nebraskan", I appeal to you all.

This proposed moratorium is not based on evidence, it is based on emotion. The land, in every watershed in this state, is "working land", not just for tourists.

Agriculture is one of the main reasons that Nebraska is so natural and clean and beautiful. Without the science to back up this decision, a bad precedent is being set forth. It surely backs to me, the agriculture, as we know it and carefully practice it,

is being attacked, by people
that do not understand it.
And, that people that know
nothing, or, very little, about
modern farming, are doing
their best to legislate and
regulate Arkansas / American
family farms, out of
business.

Please know this; if we
are put out of business,
nobody is going to like
foreign production of our
food & fiber.

Thank you. I shall
remain, Sincerely Yours,

Libbie Dougan
