Subject: Buffalo River Threat

Our national treasure, the Buffalo National River, is sorely threatened by the Cargill Hog Farm recently permitted to operate in the area. As an outdoor enthusiast who has felt extremely privileged to have this wonderful river for enjoyment and as a gift of tranquility and peace in nature, I am extremely concerned. Perhaps it is too late to change what is already in operation, but it is not too late to prohibit this in the future with your help. You have the factual information about this threat, I am sure, but please know that I, as a long-time NW AR resident am strongly opposed to future CAFOs being permitted in our area. Asking you for your assistance in this matter, Nancy Garner
