Subject: Ban new medium and large CAFOs

in the Buffalo River watershed.

Dear To Whom it Concerns,

I strongly support this ban. I feel certain you have heard all the good reasons for this ban including concerns for the environment. especially the water quality, public health, and the economical well being of the area. I would like to re-enforce these points and ask for your wisest decision in this matter, i.e. a decision that would be for the well-being of the environment (ultimately our home while we live in this world), and the general public who stand to suffer----- not the money made by the corporation involved.

Thank you for your attention, Sincerely, Nancy Harris, Fayetteville Resident
