Subject: Buffalo River Moratorium.

Dear members of the ADEQ,

I have watched the war waged on our C & H Hog Farm. I understand that some of our local state citizens have a great concern about the possible damage to the Buffalo River. I share their concern. However I also see where the farmer has met or exceeded all the pollution regulations laid down by our state officials. I am deeply concerned about a great deal of money being spent by out of state parties in attempt to put the farmers out of business. I urge you to allow the studies by our state officials and the Uof A to stand in judgment on this dispute, and not out of state money. Thanks for your service. Phillip
