Subject: Swine operations hearing Buffalo River

To Whom it May Concern:

I know that you have received all of the scientific evidence of why this is bad for the Buffalo. So, I won't go into all of that again. My family, friends and myself spend a lot of time on the river. Although there are other places that we could go, we frequently drive up from Little Rock and spend time on the river, as well as money in the area.

To have its beauty, purity and integrity decimated by hog farming operations would be a terrible loss to not only residential Arkansans, but those who come here for the purpose of spending time on this wonderful Arkansas treasure. Despoiling this river would be a blow not only to those of us who love to be on it, but also the many industries whose livelihood depend on its sheltered state.

I implore you that there be no allowances for hog farming operations nor new ones established that can in anyway have an impact on this river.

Sincerely yours,

Randi M. Romo
