To: Arkansas Pollution Control and Ecology Commission

Arkansas Department of Environmental Quality

I am opposed to the changes in Regulations 5 and 6. Let me state why.

As a commercial poultry grower, I abide by and follow regulations made by the company I grow for. The reason is simple. It makes more money and keeps the environment clean.

Regulations which are only based on precautions and possibilities are unnecessary and restrictive. They set precedents for other regulations to follow.

Any time almost 1.5 million people are in the Buffalo River in a season, it stands to reason that those people are part of any pollution in the River, not a hog farm five miles away.

For these reasons and others, I oppose any changes to regs 5 and 6.
