Subject: Ban all Cafo's from BNR watershed

I support the proposed 3rd party rule making for Regulations 5 and 6 the Buffalo River watershed ban on swine CAFO permits on our nation's first

National River. My concern is that the ban does not go far enough. All

CAFO's should be banned from the BNR watershed. ADEQ should review its mandate to protect the environmental quality of Arkansas' land, air, and water, and cease issuing permits that allow polluters to degrade our natural environment.
