Subject: Please ban swine operations near Buffalo River

Dear Mr. Doug Szenher, Arkansas Department of Environmental Quality;

Please support a ban on future swine operations near the Buffalo River. It will only ruin the water quality of the rivers and the underground water table.

I wish we never let so many chicken houses be built here in Arkansas. The rivers have a blue green color in the summer from the pollution from the chicken manure that is spread on the fields. It is too bad that such a pretty state is treated with such disregard.

Thank you for your time.

Yvonne Armstrong
