**Subject:** Proposed to Rules 5 and 6 regarding confined animal operations

I am in favor of the new regulations--in fact would hope that some time they can be strengthened even further. I believe the crucial issue here is concentration of potential pollutants. These operations are more concentrated than anything that has located this close to the Buffalo River and we need to regulate them more closely so that their concentrated waste products do not have a chance to pollute this special water system. I believe that people have a right to use their property to make a decent living in the way they choose as long as it does not reduce the value of other peoples property--water and air pollution reduce the value of other land holders nearby and impinge on the right of all who chose to enjoy a national river that is relatively free from pollution.

Sincerely,

Annee Littell
