Subject: Please Amend Regulations 5 & 6

Please Amend Regulations 5 & 6 to BAN medium and large confined swine operations in the Buffalo National River watershed.

The geology of this area is not suited for large waste ponds, and we have seen from failures in North Carolina that such ponds can fail and permanently damage a river.

The Buffalo River has brought so much pleasure to Arkansans and out of state visitors. My friends fought long and hard to get this river preserved as part of our National Park system. My grandchildren love to float on the Buffalo. Please do not let this treasure be polluted by confined swine operations in its watershed!

Sincerely,

Bettie Lu Lancaster
