Subject: Comment for proposed changes to Reg. 5 and 6

To: "Olesen, Nonah M" <Nonah9@live.missouristate.edu>, Fay Knox <carolyn.fay.knox@gmail.com>, jim westbrook <jim@westbrookbronze.com>, Fay Knox <fayknox@yahoo.com>

Hey, if you want, go to the Buffalo River Watershed Alliance website and click on the comments link for the ADEQ hearing. Send in a comment for the record. It's all about numbers of responses they get.

Here is the one I just sent. I copied their own words and then added a few of my own.

We support the proposed changes to APCEC Regulations 5 and 6 that seek to prohibit the ADEQ Director from issuing Regulation No. 5 permits for Confined Animal Operations, and Regulation No. 6 permits for Concentrated Animal Feeding Operations, for facilities in the Buffalo National River Watershed with either 750 or more swine weighing 55 pounds or more, or 3,000 or more swine weighing less than 55 pounds. The regulation changes will prohibit an increase in the number of swine at existing facilities in the Buffalo National River Watershed.

Stopping CAFOs in the Buffalo River Watershed is a high priority for us. It is a national treasure that ADEQ should aggressively protect with preventative measures to insure its future for our

children and grandchildren, whether they use the river for swimming and canoeing or they make a living farming or in local business.

Sincerely,

Susan K. Parker
