Subject: Remove C & H CAFO Permit

Dear Ms. Marks,

I am writing to ask you to act to remove the permit for C & H.

C&H is the first industrial-scale hog facility to be located in the watershed of the iconic Buffalo National River and the first facility in Arkansas to be granted coverage under the NPDES Concentrated Animal Feeding Operations ("CAFO") General Permit ARG590000.

I live and work on my family farm near the CAFO. My Great-great grandfather was a Civil War Doctor and physician in the community here. Even in those days they understood the dangers of drinking and bathing in unhealthy water. The sweet spring that they used for all of those years is now in eminent danger of pollution due to your actions at ADEQ.
