**Subject:** No CAFOs in the Buffalo Ntl River Watershed

Cargill, dba C&H hog farm in Mt Judea should be shut down. No CAFOs should be allowed in the vicinity of the Buffalo National River; our most beautiful treasure in the Natural State.

CAFOs will eventually ruin the Buffalo River and people's wells they depend on for water to drink.

It will eventually cost jobs in the tourism industry.

It is forcing people in Mt Judea to consider leaving their cherished homes and land. But their places are worthless now. How can they sell now, with stench of pig shit in the air, right on their front porches.

What if this happened to you, in the place you expected to live out the rest of your life?
