Subject: Buffalo River and CAFO's

I support the new changes and the recommendations to notify all the stakeholders affected by the pollution of the rivers and watershed areas by a CAFO. I also support the creation a server list that people can subscribe to for notification and inclusion of the National Forest Service, National Park Service, Health Department, utility departments such as those in Tulsa that may be affected by the pollution. Allowing a CAFO in the Buffalo River Watershed was a terrible mistake. This type of pollution by one person or company of the water used by others should not be allowed.
