

TO APC&E AND ADEQ

From Phyllis Head > 402 East  
Fayetteville, AR 72701

We have entrusted you, YOU  
to protect the environment in Arkansas.

It is not my job. Yet, here I  
am, time and time again, to appear  
before you and to share my concerns about  
The Buffalo River.

I get letters from you, thanking  
me for my participation. This is  
not what I am after.

I want you to acknowledge that  
a bad decision was made in 2011  
by the ADEQ, to grant a permit to  
The C & H Hog facility to operate  
a Confined Animal Feeding Operation  
in the watershed of our states most  
precious jewel AND our countrys first  
national river even

I am an Arkansian. Though I may  
not sound like one, I have lived  
and raised my family right here in  
the natural state for 34 years now.

I am a law abiding, Tax paying  
citizen of this great state, and one  
thing I am most proud of is the  
natural beauty of the Buffalo River.  
You should be too. You should

be protecting this rare gem  
rather than contributing to the  
contamination of this most  
spectacular river by the C+H  
Hog faculty.

I pray that you, also good citizens of AR,  
can find a way to do the right  
thing & protect this sacred land.

This land is very similar to the  
cave of Lourdes, France. I went on a  
pilgrimage there as a Catholic Christian  
to the cave where my blessed mother appeared.  
It inspired me to get involved in respecting  
& protecting our very own mother, Mother Earth.

To make matters worse, another permit  
is pending for ERC Forms to transport  
one of the excess waste across rural roads  
to "apply these nutrients to the waters head  
of the Little Buffalo River, Shop Creek, and Big  
Creek.

I am not a scientist but I am not stupid  
either.

How dare you! Rather than solving the  
original problem, the original permit granted  
to C+H Forms in 2011.

You continue to add fuel to the fire. Spread it around  
more, spread it onto the equally sensitive Korst an-  
nouncement of the Little Buffalo River.

How DARE you? once again I implore you to  
do the right thing. I may not be a scientist  
BUT I am not STUPID either.
