Subject: Continuing Planning Process & Antidegradation Implementation Methodology

Dear Jacob Harper,

My family and I routinely visit natural areas here in the state. We are very concerned about water regulation, especially in light of the disastrous decision to allow a hog factory to operate in the Buffalo River watershed.

We urge DEQ to protect the streams and lakes my fellow Arkansans and we use for drinking water, wildlife watching, fishing, swimming, and boating. Please be sure that the CPP and AIM:

- Protect high quality streams in our state and national parks, wildlife refuges, and wilderness areas from new pollution.
- Properly establish protected baseline water quality through testing and data analysis.
- Account for non-point sources of pollution when making point source permitting decisions.

Further, we support the the comments submitted by Ozark Water Watch, Arkansas Public Policy Panel, and their partners.

Thank you for your consideration.

Sincerely,
Ms. Cindy Franklin
