Questions Comments:

I am concerned that you are basing your placement of Big Creek on the impaired list by accepting test from private citizens who are very vocal in their actions to shut down C&H Farms. I think you should rely on non partisan scientists to determine impairment on Big Creek. The state of Arkansas has invested serious money to study the impact of C&H, but still you want to rely on data provided by those who have not had the training to do studies for water quality. That is very troubling to those of us who trust sound scientific testing over emotion. Also conducting blind testin on the Buffalo River must be done by non biased groups before you decide to place the river on an impaired list. Listen to all the people not just the ones who bang on your door the most.
