Figures L.2.1 through L.2.50 show spatial plots both annual and seasonal scenarios for the PM_{2.5} species for the normalized mean bias and normalized mean error. Also, Figures L.2.51 through L.2.60 show boxplots of observed and modeled data for the PM_{2.5} species. Tables L.2.2 through L.2.6 show MPE statistical parameters such as correlation, fractional bias, fractional error, normalized mean bias etc. for the HEGL1, MACA1, MING1, SHRO1, SIPS1, and WIMO1 Class I locations. Also, Figures L.2.61 through L.2.66 show the model performance for visibility light extinction in Mm⁻¹ for the Class I areas located outside of Arkansas.
