

NOTICE OF PUBLIC MEETING

BFI Model Fill Class 1 Landfill
Permit No.: 0151-S1-R4 AFIN: 60-00565

The Arkansas Department of Environmental Quality (ADEQ), under provisions of Regulation No. 22 of the Arkansas Pollution Control and Ecology Commission, has scheduled a Public Meeting in North Little Rock, AR, on Tuesday, April 18, 2017, to discuss the Assessment of Corrective Measures (ACM) for remedying impacts to groundwater at the landfill located in Pulaski County, AR.

The scheduled Public Meeting will be held in the Commission Room at ADEQ's home office, 5301 Northshore Dr., North Little Rock, AR. The meeting is scheduled to begin at 6:00 p.m.

The ACM was approved by the ADEQ Regulated Waste Operations, Office of Land Resources on January 18, 2017. Included in the ACM is an assessment and analysis of the effectiveness of potential corrective measures, including but not limited to: the estimated performance and reliability of the implementation, potential impacts of appropriate potential remedies, as well as the time required to begin and complete the remedy, costs of remedy implementation, and other requirements in place to protect public health and the environment.

The purpose of the Public Meeting is to provide interested persons with the opportunity to meet with ADEQ and the facility's staff and informally discuss the ACM. Since the meeting is not a formal hearing, no prepared statements are necessary, and no formal comments are recorded during the process. Based on the results of the corrective measures assessment and public meeting comments from interested and possibly affected parties, the owner or operator of the facility will select a remedy, which must meet the provisions set forth in APC&EC Regulation No. 22.

Additional information on the ACM and selected potential corrective measures is available from Charles Johnson at (501) 682-0832 or Blake Whittle at (501) 682-0843.

Dated this 15 day of March, 2017
Becky Keogh, Director
Arkansas Department of Environmental Quality
