RE: NPDES Permit # AR0021865  
**Field Inspection September 18, 2006**

Ms. West,

On September 18, 2006, you performed an inspection of our wastewater treatment facility.

As you are aware, we are currently in the process of constructing an SBR system on our site. During your inspection, we were found to be exceeding turbidity limits when removing rain runoff from the area under construction. At that time you directed us to obtain a "Short Term Activity Authorization" permit. We immediately halted all construction activity. We also, immediately applied for the recommended "Short Term Activity Authorization" permit. On October 16, 2006 we obtained that permit. The permit was signed by ADEQ, Director, Marcus C. Devine. Listed as contact person, was Keith Brown, ADEQ Water Division. After the signature, was listed "cc: Alison West, District Inspector.

Please accept our apologies for misunderstanding that an additional response to your office was required to be sent by us. Please consider this to be our response to that inspection.

Thank you,

Jay Wilson  
Public Works Director
