**Additional Comments:**

**\*Facility has been using in excess of 25,000 GPD for several months. Facility personnel could not account for that amount of water usage and stated they only used water for sanitary sewer and replacement water for non-contact cooling water lost to evaporation and occasional minor leaks. CWL personnel removed and tested the water meter and found that it was within tolerance for accuracy. The facility's water usage has been reduced to approximately 3,500 GPD since the inspection. CWL has sent the facility an IU survey and will continue to monitor the situation and permit as required.**

RE: Container Components Storm Water Inspection.

Dear Mr. Wilkinson:

On October 22, 2008, an Industrial Storm Water Inspection was conducted at the site located at the Container Components Facility, Craighead County, Arkansas.

Notice of the inspection was mailed to you on November 26, 2008. A response was requested by December 16, 2008. As of the date of this letter, a response has not been received.

According to ADEQ Records, this site does not have an NPDES Storm Water Discharge Permit as required by law. You were to obtain this Permit from ADEQ. Because of this, you are requested to complete and submit the enclosed NPDES Permit Application, Disclosure Statement and EPA Form 2F. If you have any questions or require assistance to achieve this requirement, please contact Kim Fuller at 501-682-0643 or you may e-mail her at [fuller@adeq.state.ar.us](mailto:fuller@adeq.state.ar.us).

Please submit a response to the inspection findings, the requested forms and any mitigating circumstances you wish the Department to consider prior to initiating formal enforcement actions, to the Department, by **September 29, 2009**.

Thank you for your attention to this matter. Should you have any questions, feel free to contact me at 501-682-0636 or you may e-mail me at [boycej@adeq.state.ar.us](mailto:boycej@adeq.state.ar.us).
