

April 1, 2009

Mr. Arnold Rogers, Plant Superintendent City of Harrison Wastewater Treatment Facility P.O. Box 1715 Harrison, AR 72602

RE: AFIN: 05-00054; NPDES Permit No. AR0034321

Dear Mr. Rogers:

On January 30, 2009, I performed a reconnaissance level inspection of the waste water treatment facility in accordance with the provisions of the Federal Clean Water Act, the Arkansas Water and Air Pollution Control Act, and the regulations promulgated thereunder. This inspection did not reveal any violations.

This inspection was performed to assess the damages from the large ice storm which struck the area the previous week resulting in wide-spread power outages. The Department appreciates the effort and expense put forth by the City in recent years to fully provide back-up power for its entire wastewater treatment and collection system. By being so well prepared for the emergency created by this ice storm, the City was able to prevent the discharge of any untreated/partially treated wastewater.

If I can be of any assistance, please contact me at (870) 446-6170 or by e-mail at Kirkpatrick@adeq.state.ar.us.

Sincerely,

Bruce Kirkpatrick

District 2 Field Inspector

lift station overflows or reduction in plant treatment functions as a result of power outages from the ice storm. The plant's recently installed stand-by generator is capable of powering the entire wastewater treatment facility.																					
Back-up power at the City's six lift stations is provided by dedicated generators or a portable/ trailer mounted unit.																					
At the time of inspection the facility was producing what appeared to be a high quality effluent.
