Section D: Summary of Findings/Comments (Attach additional sheets if necessary)

A reconnaissance level inspection was performed on 1/19/2011 in response to a 1/18/2011 report by the City informing the Department that one of the facility's two clarifiers was out of service and would be so for approximately one month. It was reported that the facility would be able to meet all effluent limitations unless heavy rainfall resulted in high inflow to the plant. This inspection revealed that at the time of inspection the facility was producing what appeared to be a high quality effluent. No visual adverse impacts were observed at the WHI0066 ADEQ Ambient Monitoring Site which is just down stream of Outfall 001. The violation of by-passing this treatment was previously reported by the permittee. No letter will be sent to the facility.
