Northwest Arkansas Regional Solid Waste Management District C/o Melinda Caldwell VIA Recyclables 927 West Rush Street Harrison, AR 72601

RE; Quarterly Inspection AFIN; 03-00208 Permit; #0022-SWTP

Dear Ms. Caldwell:

On March 14, 2013 I performed a routine inspection of your facility pursuant to the Arkansas Waste Tire Program, Reg. 14, and the above referenced permit. A copy of the inspection report is enclosed for your review.

Please refer to the attached inspection report to note the specific allegations. A written response for the noted allegations, describing the corrective action taken or to be taken, must be submitted to my attention at the address listed below within thirty (30) days from the date hereof. Failure to submit the written response shall be construed as an admission of any allegations. Any items noted that are neglected and/or persistent may warrant formal enforcement action.

If I can be of any further assistance, feel free to contact me at (870-424-3322).

Sincerely,

Gary Meador, Inspector

Jan Menda

Solid Waste Management Division

Facility operates in accordance with permit documents 14.1201

Waste tire processing facilities shall obtain a permit and shall meet the requirements contained in this regulation for waste tire processing facilities (Waste Tire Processing Facility Requirements) or shall meet the general permit requirements contained in this regulation.

Reg.14.1215 Annual Reporting

Owners and operators of waste tire processing facilities shall submit to the Department an annual report by March 1 that summarizes information on facility activities. The report shall be submitted to the Department on Form TP5 (Waste Tire Processing Facility Annual Report).

Comments:

There has been no Annual Report submitted for 2010 or 2011.

Mosquito and rodent control 14.1209 Vector Control; 14.1402(E) Outdoor Above - Ground Tire Storage

Vector Control: An approved vector control program must be operational at all times for tires stored outdoors.

The owner or operator shall develop and implement a program to control mosquitoes and rodents or request such control measures from the local mosquito and vector control office, so as to protect the public health and welfare. Mosquito control measures may include covering containers and trailers used for the collection and storage of waste tires with a tarp or placing them under some type of constructed cover during inclement weather and/or when the business is closed.

Comments:

Although mosquito breeding season has not started, there were no evident signs that the Permittee has implemented any type mosquito or rodent control measures.

402 (I) Access to site controlled

Access to the site shall be controlled through the use of fences, gates, natural barriers or other means approved by the Department.

Comments:

There is no access control into the permitted area at this time.

Permit Number

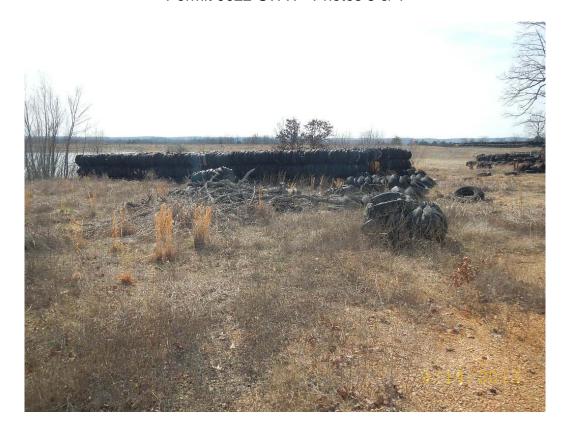

Category 3 Comments									
Processed tires meet storage criteria 14.1204 The storage limit for processing facilities is thirty (30) times the daily capacity of the processing equipment used. Comments: According to the Baling Contractor the daily capacity of the processing equipment was approximately 2000 tires a day. Based on the daily capacity of the processing equipment maximum storage capacity for the facility would be 60,000 tires or 600 bales at 100 tires per bale. However, Site Specific Permit Conditions number 3(b) states that the number of tires at the site shall not exceed 28,000 passenger and truck tires at any time. Comments: The Facility has an estimated 4000 bales X 100 tires per bale = 400,000 tires on site. Exceeding their storage limit for the permitted area. See attached Google Earth Image of the approximate permitted area.
