The permitted emissions from this new source (SN-31) are: PM @ 13.6 tpy and PM₁₀ @ 0.7 tpy. This permit modification also contains updated emissions limits based upon current AP-42 emission factors and confidential input data (Unimin Corporation wishes to maintain confidentiality on the amount of material processed). In addition, the permittee submitted several comments to the Draft Permit on October 27, 2004, and these comments were included.
