- In addition to changes listed the permit, insignificant activities were revised, regulatory citations were updated, and formatting changes were made.
- 40 C.F.R. Part 63, Subparts JJJJ and ZZZZ were included in the Applicable Regulations table of the permit shield.

7. COMPLIANCE STATUS:

The following summarizes the current compliance of the facility including active/pending enforcement actions and recent compliance activities and issues.

In a letter dated August 23, 2019, Crane Composites, Inc. (the facility) requested consideration under DEQ’s Environmental Self-Disclosure Incentive Policy for an unpermitted 63 hp natural gas-fired emergency generator. The generator is subject to 40 C.F.R. Subpart JJJJ—*Standards of Performance for Stationary Spark Ignition Internal Combustion Engines*. As part of a Consent Administrative Order (LIS No. 20-122), the facility agreed to pay the sum of five hundred seventy-six dollars (\$576.00) to the Division in full settlement for instances of noncompliance. The engine was included as SN-09 in the facility’s Title V permit on March 5, 2020 with the issuance of Permit No. 211-AOP-R4. The settlement amount has been received by the Division, and the matter was closed.

The last inspection was conducted February 27, 2020. No areas of concern were identified. A review of ECHO revealed no additional CAA violations in the last twelve quarters.

A 12,000 gallon core resin tank (Tank 6) was installed and operated prior to submitting a permit application. The application submitted February 26, 2021 requested to add the tank as a permitted source. As part of this revision, Tank 6 was included in the Mixing and Storage Tanks (SN-08).

8. PSD/GHG APPLICABILITY:

14. AMBIENT AIR EVALUATIONS:

The following are results for ambient air evaluations or modeling.

a) NAAQS

A NAAQS evaluation is not required under the Arkansas State Implementation Plan, National Ambient Air Quality Standards, Infrastructure SIPs and NAAQS SIP per Ark. Code Ann. § 8-4-318, dated March 2017 and the DEQ Air Permit Screening Modeling Instructions.

b) Non-Criteria Pollutants:

The non-criteria pollutants listed below were evaluated. Based on Division of Environmental Quality procedures for review of non-criteria pollutants, emissions of all other non-criteria pollutants are below thresholds of concern.

1st Tier Screening (PAER)

Estimated hourly emissions from the following sources were compared to the Presumptively Acceptable Emission Rate (PAER) for each compound. The Division of Environmental Quality has deemed the PAER to be the product, in lb/hr, of 0.11 and the Threshold Limit Value (mg/m^3), as listed by the American Conference of Governmental Industrial Hygienists (ACGIH).
