Re: Quarterly Activity Report – TRE Plan El Dorado Chemical Company  
NPDES No. AR0000752, AFIN- 70-00040

Dear Mr. Pemberton:

This letter represents the 5<sup>th</sup> Quarterly Activity Report pursuant to the project schedule for the Toxicity Reduction Evaluation Plan for El Dorado Chemical Company, Outfall 007 for *Pimephales promelas*.

Outfall 007 has passed the monthly 48-hour Whole Effluent Toxicity (WET) Test for *Pimephales promelas* required by the permit for the months of August 2019, September 2019, and October 2019 at 100% effluent. In accordance with the approved TRE plan, no additional TIE or TRE activities can be pursued in the absence of toxicity at the 100% effluent dilution.

Monthly WET testing will continue for Outfall 007 and TIE/TRE activities will be conducted should the outfall exhibit toxicity at the 100% effluent dilution. Please contact me at [DSartain@edc-ark.com](mailto:DSartain@edc-ark.com) or (870-863-1403) for additional information. Kyle Hathcote of GBMc & Associates can also be contacted for questions or information at [khathcote@gbmcassoc.com](mailto:khathcote@gbmcassoc.com) or 501-847-7077.

Respectfully submitted,

David Sartain  
El Dorado Chemical Company
