Subject: RE: AR0000752 EDCC 006- & 007 Streamflow Warning
Date: Wednesday, January 24, 2018 9:35:18 AM

Layne,

Please take a look at the permit (part 2 of 1B) it states, "the permittee must have the stream flow monitoring equipment installed to measure the stream flows downstream of Outfalls 006 and 007. This equipment must be operating within six (6) months of the effective date of the permit. The permittee must submit a written certification, signed by the responsible official, that the equipment has been installed and is operational 195 days of the effective date of the permit." We now have the equipment set up and will be submitting written certification shortly. If you have any questions, feel free to give me a call.

Thanks

David Sartain

Subject: AR0000752 EDCC 006- & 007 Streamflow Warning
Importance: High

David,

It has been brought to my attention that the Streamflow values for outfalls 006 & 007 are overdue for the Oct 2017 monitoring period. In the comments section of NetDMR there is a notation, "Streamflow - Downstream Monitoring is not required."

If there isn't a wavier or some sort in the permit, a violation letter will have to be issued.

Could you bring me up to speed on this?

Thank you,

Layne Pemberton
