RE: El Dorado Chemical Company  
NPDES Permit No. AR0000752 – AFIN 70-00040  
Compliance Schedule – Year 1 Progress Report

Dear Mr. Healey:

El Dorado Chemical Company (EDCC) currently maintains coverage under NPDES Permit No. AR0000752, effective October 1, 2017. Pursuant to the requirements of Condition No. 1 of Part 1B of the referenced permit, this letter serves as the first-year progress report toward achieving compliance with final effluent limitations for:

- a. Dissolved Oxygen for the months of May through October for Outfall 003,
- b. Ammonia-Nitrogen, Chlorides, Sulfates, and TDS at Outfalls 001, 002, 003, 006, 007, 102ST, and 103ST,
- c. *P. promelas* and *C. dubia* sub-lethal limits at Outfall 001.

The following paragraphs address the compliance issues regarding activities related to permit compliance in Year 1.

- a. Final Effluent Limitations for Dissolved Oxygen for the months of May through October for Outfall 003

The Dissolved Oxygen limits at Outfall 003 were stayed as part of the permit appealed filed on September 27, 2018 for the referenced permit. In accordance with Permit Appeal Resolution for Docket No. 17-001-P, LIS 18-060, July 6, 2018, the interim permit limit will go into effect on January 1, 2019. Thus, sampling for Dissolved Oxygen at Outfall 003 will not be initiated until January 1, 2019. Compliance with final permit limits can be further evaluated once routine sampling begins.

b. Ammonia-Nitrogen, Chlorides, Sulfates, and TDS at Outfalls 001, 002, 003, 006, 007, 102ST, and 103ST

Final permit limits for Ammonia-Nitrogen, Chlorides, Sulfates, and TDS at Outfalls 001, 002, 003, 006, 007, 102ST, and 103ST were stayed as part of the permit appeal filed on September 27, 2017 for the referenced permit.

In accordance with Permit Appeal Resolution for Docket No. 17-001-P, LIS 18-060, July 6, 2018, EDCC proposed a TMDL study that would collect water quality data in the ELCC Tributary and other information that can be used to modify the TMDL for the ELCC Tributary (and other tributaries) that are subject to the TMDL. EDCC and ADEQ agreed that a modified permit with final effluent limitations should not be issued pursuant to the Permit Appeal Resolution until after EDCC has been given time to complete the TMDL study and seek EPA approval of a modified TMDL.

The data collected during the TMDL study will be used to re-evaluate the TMDL, including load and wasteload allocations (upon which final limits for Ammonia-Nitrogen, Chlorides, Sulfates, TDS are to be based). ADEQ agreed to the proposed scope of work. Field data collection for the TMDL study has been completed and the data is being analyzed. Ancillary information is currently being collected and should be complete by December 31, 2018. As specified in Order and Agreement No. 5 of the PAR, a revised ELCC tributary report (a modified TMDL) will be submitted to ADEQ by March 31, 2019.

c. *P. promelas* and *C. dubia* sub-lethal limits at Outfall 001

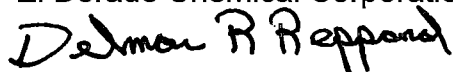

In accordance with NPDES Permit No. AR0000752, EDCC utilizes Outfall 010, which discharges to the Ouachita River Joint Pipeline, as its primary outfall. Outfall 001 would only be used during emergency situations. EDCC commenced discharging to the Ouachita River Joint Pipeline in September 2013. Outfall 001 has not discharged since November 2013. If future discharges from Outfall 001 occur, evaluation with final permit limitations will be conducted.

In addition to these activities, Condition No. 2 pertaining to flow monitoring downstream of Outfalls 006 and 007 has been completed. A letter of written certification for flow equipment installation and operation was submitted to ADEQ on April 9, 2018.

Hopefully, this letter has adequately explained the status of our NPDES efforts with respect to Schedule of Compliance activities over the last year. Should you have any questions, please feel free to call David Sartain at (870) 863-1403.

Sincerely,

El Dorado Chemical Corporation

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

**Warning:** Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number. Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time limits, see current FedEx Service Guide.
