Re: NPDES Permit No. ARR0000752 – El Dorado Chemical Corporation
Revised January 2013 Discharge Monitoring Report

To Whom It May Concern:

Please find enclosed revised Discharge Monitoring Report Page for the above referenced permit for the January 2013. Total Suspended Solids (monthly average loading and concentration), Ammonia-Nitrogen (monthly average loading), and Nitrate-Nitrogen (monthly average loading) were miscalculated in the Discharge Monitoring Report submitted in February 2013.

Data for Total Suspended Solids was not entered in the DMR calculation excel spreadsheet for January 15, 2013. Also, the formula to calculate the daily mass loading for Total Suspended Solids, Ammonia-Nitrogen, and Nitrate-Nitrogen was missing for January 28, 2013. These issues resulted in the calculated values for the above mentioned parameters being inaccurate.

We appreciate your attention in this matter. Please do not hesitate to contact Barry Rowe at (870) 863-1400 if you have any questions or need additional information.

Respectfully Submitted,
El Dorado Chemical Corporation
