RE: NPDES Permit No.: AR0000752, AFIN: 70-00040
Response to Corrective Action Plan

Dear Mr. Withrow:

On February 20, 2015, a letter was sent to El Dorado Chemical Company requesting a Corrective Action Plan (CAP) to address the effluent violations. On March 19, 2015, a letter was received by the Department addressing the effluent violations. ADEQ has completed its review and has no comments to the Corrective Action Plan.

Please take note that, according to Part III, Condition 2 of the Permit, El Dorado Chemical Company must discharge to the pipeline through outfall 010 unless there is an emergency with the pipeline. At that time, and only at that time, the facility may discharge to their individual outfalls 001, 006 and 007. If an emergency does occur, El Dorado Chemical Company can only discharge to their individual outfalls 001, 006 and 007 if they maintain compliance with the effluent limitations.

Any violation of your NPDES Permit is subject to enforcement action that may include the assessment of a civil penalty by this Department.

Thank you for your attention to this matter. Should you have any questions, feel free to contact me at 501-682-0630 or you may e-mail me at allen-daniel@adeq.state.ar.us.

Sincerely,

Leslie Allen-Daniel
