Subject: Unpermitted Discharge Notification - 23 November, 2020 - Paul R Noland WWTF [AR0020010, AFIN 72-00781] - BMS [4748-WR-4, AFIN 72-00829]

Good morning Mr Pemberton,

I wanted to send notification that Monday morning, November 23rd, the Biosolids Management Site and Noland WWTF experienced an unpermitted release of fully treated W3 effluent from an unexpected air-release valve (ARV) failure, estimated to be 1 million gallons.

Staff stopped the W3 release within an hour of discovery.

The failed ARV remains isolated while staff await delivery of a replacement ARV, which will be exchanged with a stainless unit to protect against a similar equipment failure.

Additionally other lateral line ARV's at the BMS have been isolated while not in use to prevent a similar incident.

The effluent was released onto BMS property and flowed into land application Area's #2, 3, 4 & 5.

Run-off did leave application Area's 4 & 5 and entered an unnamed intermittent stream connected to the White River.

No adverse environmental impacts have been observed and none are expected.

Thank you, an online report has already been submitted, and please feel free to reach out to me if you have any questions.
