Follow Up Flag: Follow up
Flag Status: Completed

The following is a CAP update for the Melbourne Project.

- The city has been addressing problems as they are discovered. The more of these that they can do in house keeps them from having to go to an outside contractor and incur additional expense.
- The final evaluation of the system is scheduled to be done the week of December 11, 2017
- The final SSES report will be submitted to the City and ADEQ on January 15, 2018. This report will set the final schedule for any remaining repairs needed as well as any plant facility improvements and major repairs that require an outside contractor.
- The pond closure is complete. The final certification package will be submitted by Dec. 31, 2017

In January 2018 we will submit a revised schedule for the work that needs to be completed. We will also submit an evaluation of the dmr data for the last 12 months to see what effect the existing changes have made on the system.

We will be sending another update for the CAP on January 15, 2018. If you have any questions or have any comments, please do not hesitate to contact us.

We are in the process of finalizing the SSES report and recommendations for the CAP. I will go ahead and send the update and we will have the SSES report complete within the next 2 weeks.

Thanks
