Bailey we have the final draft of the SSES completed and planned on submitting it this week. But during the recent rain events, the City has discovered another area that needs to be added to the scope of the project. We are meeting with the City next week on Wednesday, March 7, 2018. At that time we will gather the information on the additional problem location and will add it to the report. We will plan on submitting the report, on or before March 15, 2018.

Sorry for the delay, but this report will be the basis for the application for funding for the project and needs to be as complete as possible so that we can secure adequate funds for the project.

If you have any questions or comments, please do not hesitate to contact us.

Sincerely

### **James Dreher**
