Mr. Breckenridge,

I received the voicemail you left. The Proposed CAO I sent out was before I'd been informed that the City had switched engineers. I thought it would be likely that SALT would want to adjust the CAP/milestone schedule from what the previous engineers had planned. For this reason, the Mayor **should not** sign the Proposed CAO I sent. We will wait until you have submitted your CAP/milestone schedule, then DEQ will make edits to the CAO as necessary. Once that process is complete, we will send out the corrected Proposed CAO, and the Mayor may sign at that time. The City will not be penalized for not signing and returning the CAO I previously sent within the 20-day deadline.

Let me know if you have further questions or concerns.

Thank you and have a good weekend,

## KRISTEN GRAHAM
