RE: NPDES Permit Number: AR0020117, AFIN: 69-00011
Corrective Action Plan Response

Dear Ms. Taylor:

This is in reference to your letter dated July 19, 2017, as you and I have talked about on the phone we seem to stay in compliance unless we have excessive rainfall. We are trying to address any problem areas we find. We are working on adding a new lift station in the area of Maple Drive and Downey Drive this year. Which we just received a letter of approval from the Arkansas Department of Health on July 26, 2017. We fixed a manhole in the school area that had an inflow issue this was on July 27, 2017. We stated that we still have about 85 manholes that needs to be rehabbed, and we are still trying to work these into our schedule looks like it will be sometime in 2018. We will continue to address customer's service lines as they do have an impact on the sanitary sewer overflows. We will continue to smoke test and camera any main lines that we have not done yet and replace anything that we find. We do hope that what we have done so far and will continue to do will improve our issues of staying in compliance although excessive rainfall is the problem.

If you have any other questions, please give us a call.

Sincerely,

Roger Gardner, Mayor, City of Mountain View
