Subject: Permit Renewal Reminder

Good morning,

I am reaching out to you regarding your permit renewal application for the City of Mountain View (AR0020117, AFIN 69-00011). Your permit will expire on 07/31/2023. In order to continue discharging past the permit expiration, a complete permit renewal application **MUST** be submitted to the Division 180 days prior to the expiration date, by **02/01/2023**.

I am with the Enforcement Branch in the Office of Water Quality. As the renewal deadline approaches, we try and reach out to the permittee to ensure that they are aware of the due date. If the Division does not receive a complete permit renewal application by **02/01/2023**, the only way to grant permit coverage until a new permit is issued, is through a Consent Administrative Order, which will include a civil penalty. Obviously, we all want to avoid that if at all possible. That is why we try and reach out to make you aware of that due date and the importance of making sure the renewal application is received on time.

In this process, if you have any questions about your renewal application, please don't hesitate to reach out to the Permits Branch at 501-682-0623. The permit engineer working on this permit is Zachary Carroll. He can be reached at 501-682-0625 or by email at Zachary.Carroll@adeq.state.ar.us.

Please respond to this email letting me know you have received it and are aware of the deadline.

Thank you for your attention to this matter.
