RE: NPDES Permit Number: AR0020117, AFIN: 69-00011
Corrective Action Plan Response

Ms. Taylor,

This letter is in reference to the CAP letter dated on July 19, 2017. It is the City of Mountain View's intent to meet all requirements of our NPDES Permit. Two problems exist, one is at the wastewater treatment plant and the other is the sewer collection system (SSO). The City of Mountain View has scheduled Ms. Susan Poe with the Arkansas Rural Water Association to inspect and evaluate the treatment processes, and test sampling at the wastewater plant. She is scheduled to be here on Wednesday September 27, 2017 to determine if our treatment processes are functioning properly.

The city believes that the flow through the Plant during times of heavy rains and flooding that also causes the system overflows, and is a major problem for the City to overcome. The expense of reducing the infiltration and inflow into the system would be extreme. The City has worked for many years to correct the over flows with limited success.

Additionally, the City has scheduled for the collection system to be smoked tested in November weather permitting. This method has helped to locate many problems, mostly private service lines. The City also plans to evaluate with the help of Ms. Susan Poe with ARWA the overflow areas that occur during heavy rains. This process will require the work to be done during those times of overflows showing from heavy rain. If you have any questions, please call.

Sincerely,

Roger Gardner, Mayor City of Mountain View
