**Subject:** Quarterly Progress Report - City of Mountain View

This email will serve as the Quarterly Progress Report for the City of Mountain View, Arkansas. As you are aware, we are currently working on revisions to the proposed Consent Administrative Order. The revisions were emailed to ADEQ on September 6, 2018. A meeting to discuss the City of Mountain View and the proposed CAO was held on August 6, 2018 at the ADEQ offices in North Little Rock.

CWB Engineers has been working with Mountain View to formulate a plan for addressing the proposed CAO and working on intermediate measures to improve treatment plant compliance and efficiency. CWB Engineers conducted a site visit to the plant on August 24<sup>th</sup> and we have been reviewing plans and operation procedures to develop a plan of action for the treatment plant. We will continue to work on addressing issues in the collection system and at the treatment plant as we work with ADEQ to finalize the CAO document. Construction work on the force main discussed in previous quarterly reports is underway. Please let me know if you have any questions or need further information.

Thanks,

*CLINT W. BELL, P.E.*
