Subject: Sanitary Sewer Overflows (SSO's)

Mr. Anderson,

This email is a follow up to our telephone conversation yesterday December 18, 2012 regarding emails and letters associated to Sanitary Sewer Overflows. We conducted a joint meeting at your office in 2011 to discuss the concerns and efforts to reduce Sanitary Sewer Overflows. Prior to that meeting the City of Siloam Springs has been active in reducing the number of SSO's to its collection system and continues that objective. In addition the City enacted a new Fats, Oil and Grease Ordinance to regulate grease discharges into municipal system. This information was discussed and provided to you. I am reviewing all information regarding the SSO program and requesting all emails and letters you have regarding sanitary sewer overflows to insure my records are up to date.

In addition I will be sending you a letter regarding our new efforts to repair and improve numerous sanitary sewer manholes to reduce inflow and infiltration into the collection system.

Thank you,

Tom Myers
Environmental Compliance Manager
