We feel this problem was due to:

Inadequate dissolved oxygen to biological nutrient removal process. Centrifigual blowers are damaged internally. Manufacturer representatives have worked on blowers and determined can not be repaired in the field. Sent blowers to St. Peters, Missouri at manufacturer repair shop. Emergency repair work underway.

We plan on correcting the problem in this manner:

Manufacturer is repairing the blower at their shop in Missouri. Repair shop is waiting on parts and estimated repair will be done June 10, 2016. We are purchasing new blower too.

Time estimated that it will take to correct problem:

June 10, 2016 scheduled date for blower to have needed repairs. Instillation immediately upon receipt of repaired blower.

Sincerely,
