Subject: Unpermitted Discharges from Satellite Collection System

Gentlemen:

I am just following up on our June 23, 2015 meeting held at ADEQ's Office, which included representatives from the Cities of Sherwood and North Little Rock. The purpose of the meeting was to discuss the ongoing problem of overflows occurring on the Sherwood satellite collection system. During the meeting, it was agreed that the Cities would continue to work together to formulate a solution to eliminate the overflows and report back to the ADEQ. ADEQ also requested that the City of Sherwood to continue to report the unpermitted discharges under Tracking No. ARU500018 and AFIN 60-04714.

The Cities of Sherwood and North Little Rock proposed to submit the requested report on the corrective actions to ADEQ by December 9, 2015. As the date for submitting the detailed plans for eliminating the unpermitted discharges approaches, I am asking you to please include in the report the progress of the corrective actions taken by each City to date to eliminate the satellite system overflows, as well as the remaining work to be completed and a timeline to accomplish the remaining tasks.

I look forward to receiving this report, and I propose scheduling a meeting to discuss this matter further. Please let me know your availability for a follow-up meeting to be held in early January.

Thank you for your attention to this matter.

Sincerely,
