Re: Permit Number AR0021717

Dear Layne,

We need to update Arkansas Department of Environmental Quality on an issue with the City of Flippin Wastewater Treatment Plant Project. Jeremy Stone, formerly with CEA is no longer representing the City of Flippin as their Project Engineer. We will be using John Selig and Trey Foster of CEA to work on our project in the future. We have discovered that our original time lines that were submitted from our CAP and Engineer Follow-ups are not being met. After having a meeting with our attorney and Mr. Selig and Mr. Foster, we are in the process of gathering all of our information on the project to see how far behind we are and will be meeting again on Tuesday, October 30th to try to get our application for funding back on track. We will be submitting a new timeline once they have had the time to review what work has been done and what needs to be redone on the plans.

This is unfortunate that we were not aware that certain aspects of our project were not taken care of but we would like to assure you that the City of Flippin is taking all measures necessary to correct the situation and get our project back on a timely schedule.

Sincerely,

J. L. Wagoner
Public Works Director
