RE: Letter dated September 8, 2016

Ms. Taylor,

The City of Nashville Wastewater Treatment Plant experienced several NPDES permit violations in January through April of 2016. These violations were for exceeding our permit limits on Nitrogen Ammonia monthly average and 7 day average. These excursions occurred on the January, February, March and April DMRs of 2016.

The City of Nashville was in a transitional period during this time. The construction of the new plant was completed in May of 2015. The new plant went on line at this time. The learning curve for me and the operators was steep. As you can see from our DMRs from that point until now there have been no ammonia violations.

The City of Nashville Public Works Department is committed to working with you and ADEQ to maintain our compliance with our permit and ensure the water quality of the state.

Sincerely,

A handwritten signature in cursive script that reads 'Larry Dunaway'.

Larry Dunaway  
Public Works Director
